

MARINE SOLUTIONS

Welcome on board and enjoy life at sea with Vimar style.

We take the comforts of terra firma and bring them on board.

Harnessing energy is our life's work and our solutions combine technological innovation with Italian design, to bring you comfort, control, safety and energy efficiency. We use only the finest materials and pay great attention to detail: a custom approach that's a must in complex systems like ships and yachts.

Design and technology

Put the wind in your sails with our positive energy.

Over 80 years of history and a culture built on solid values: this is the key to our outstanding quality, which combines valuable expertise with a profound appreciation for innovation and design, and a willingness to embrace the new.

Bespoke quality, unique in its versatility

A limitless choice of standards, modules and installation types. We are your trusted partner, working together to explore exclusive finish options and countless functional combinations.

We are an Historic Brand of National Interest by the Ministry of Economic Development.

Ambassador of Made in Italy since 1945

The company's home, where we create, design and manufacture our products, is still located in Italy. Vimar stands out for a blend of style and technology that speaks Italian the world over. A combination of aesthetic quality and technological reliability unique in the world.

Iconic designs

We work closely with most renowned designers to ensure that we evolve in line with changing architectural styles. This approach is the starting point for our iconic design proposals, consisting of harmonious geometric forms and finishes carefully conceived to enhance the look of every setting.

Advanced technology for a low environmental impact

Sustainability, our commitment for the future.

Environmental awareness and climate change are concerns, that above all, will effect future generations. This is why we have adopted a circular economy model that guides our design thinking and processes. We have chosen positive energy.

Focus on territory and the environment

Our new logistics and production pole is an exemplary project to contribute to environmental sustainability. For the supervision and analysis of energy consumption levels in our plants, we have adopted the logic of smart metering. These example of the design choices show sustainability, architectural value and occupational comfort expressed to the full.

>1.7 GWh
energy produced by
photovoltaic system

-1,775 tCO₂
emissions avoided since
the baseline year (2018)

Products evaluated from LCA perspective

We assess the environmental performance of Vimar high-rotation products according to the **Life Cycle Assessment (LCA) approach**, according to the international reference standards ISO 14040 and 14044. The process is part of the Environmental Product Declaration (EPD) and it is based on LCA analysis to determine resource consumption and the impacts that each phase of the product's life cycle has on the environment.

Linea, unique also in sustainability

Linea replaces **traditional fossil-based plastics with renewable and recycled plastics** (certified ISCC PLUS) and also through the optimization of production processes, **it reduces by over 80% in equivalent CO₂ emissions for a saving of over 500 tonnes of equivalent CO₂ per year.**

Recycled and recyclable raw materials

The metallic components make up 80% of post-consumer recycled material. For plastic components, we use semi-finished products with a percentage of raw materials from internal recycling or semi-finished products with raw materials originating in full or in part from recycling.

97%
The portion of waste directed
to reclaiming and recycling

An ocean of benefits to have every need covered

Practical advantage in response to a full range of marine outfitting needs.

Our top priority is to foster long-lasting, deep-rooted partnerships that yield clear, practical benefits. Everything we do is driven by our commitment to communication, cooperation and support, because that's the key to developing specific and efficient solutions for marine requests.

One-stop partner. A comprehensive range

With such a wide range of products, we've got everything covered, from straightforward power management to high-level system automation, bringing you state-of-the-art solutions for connecting, monitoring and styling every area of your chosen craft.

Long-standing experience and bespoke projects

The marine industry is highly specific and we've been in it for years; so we have an extensive range of dedicated products, designed to meet every need.

With you all the way

Every client is special to us and has its own specific needs. That's why our sales consultants are technical professionals, first and foremost, with the depth of knowledge they need to support our clientèle with all their requests.

At your service, worldwide

We're major players on the world stage, with coverage of over 100 countries, so wherever you are, we'll give you what you need, when you need it.

A wealth of dedicated solutions

For every type of craft.

Whether your field is cruise ships, luxury ships, power yachts or sailing vessels, you'll have a series of specific needs to meet when it comes to design, construction, management and maintenance. Our solutions are designed to optimise and automate the functions of your craft, however large or small. Built to deliver comfort, safety and energy efficiency, they also bring you the best Italian design and ample scope for customization.

Cruise ships

These large-scale vessels combine designed interiors with advanced marine engineering, to provide first-class services for thousands of passengers, in the utmost comfort and safety.

Luxury ships

Smaller but highly prestigious, these ships provide an intimate, distinctive atmosphere offering passengers a bespoke experience that's immersive and exclusive.

Yachts

These floating villas feature tailor-made interior design, astonishing attention to detail and state-of-the-art technology. The result is all-round, absolute quality, that really does set sail in style.

Sailing vessels

Lean and purposeful, these boats slice through the waves with graceful determination. The interior styling, based on natural materials, is backed up by smart, high-tech solutions that blend seamlessly into their setting.

Suites

Cabins

Public areas

Hygiene Boxes

Cruise ships and luxury ships.

Crossover solutions to meet every need.

Our range includes crossover solutions designed to meet the needs of every part of your ship and every passenger on-board. They combine top-level design and technology in a smart, latest-generation package crafted for optimum power management in every area on-board: from large public areas to every class of cabin and from sports facilities to wellness complexes, they bring functionality, flexibility and unrivalled ease of use.

High tech Suites

Slip your card into the reader and your suite comes alive. Power is on tap, but none goes to waste. Room temperature is optimised and any pre-set custom welcome scenarios spring into action.

The resulting atmosphere creates an oasis of calm.

Cruise ships and luxury ships

Your suite comes to life

Slip your card into the reader and take in the scene. The lights come on, the temperature adjusts to the level you want and any pre-set welcome scenarios get under way.

Flexibility for easy scenario setup

Clear and customisable switches gives guests full comfort, even when it's dark.

Full control of your lighting

Adjust the intensity of your lighting, or switch your lights on or off. All with instant, one-touch control and status display.

We really do think of everything

With our high-performance devices, guests can charge their tablets or smartphones at high speed, while running another device off the mains supply if they need to.

A welcome waiting in the cabins

Our attention to detail, in both design and technology, helps make every cruise a delight.

Every cabin offers simple, functional solutions that give guests everything they need and create the feelgood factor for a memorably relaxing cruise.

Cruise ships and luxury ships

Lighting at your fingertips

All it takes is a touch to switch your lights on and off. Simply press: large buttons for controlling lighting in the cabin.

Fulfilling country-specific standards

A wide range of socket outlets to the most commonly used standards, all equipped with SICURY safety shutters to prevent accidental contact with live parts, cater for the needs of guests from various parts of the world.

We really do think of everything

With our high-performance devices, guests can charge their tablets or smartphones at high speed, while running another device off the mains supply if they need to.

The bathrooms. Functionality meets safety

Shipboard bathrooms may be compact, but they can still accommodate a range of electrical functions that ensure comfort, practicality and total safety.

Nothing left to chance

Our special socket outlets with built-in transformer automatically select the right voltage for any type of shaver you plug into them.

Fully protected at all times

Availability of an antibacterial range of switches, socket outlets and cover plates which is ideal for humid area and high-hygiene environments.

Never out of contact

In the event of an emergency, a quick tug on the ceiling pull will send out an alarm and bring help immediately.

Peace of mind, by design

The ceiling pull alarm is accompanied by an acoustic signal, while an emergency lamp makes sure you're not left in the dark even if there's a power outage.

The public areas. Control meets functionality

In the corridors, on the staircases and in other public areas of the ship, dedicated devices help make life on-board easier for passengers and crew alike. Only authorised people can get into the rooms and cabin status and service requests are always clearly indicated.

Cruise ships and luxury ships

Sensitive areas under control

Access control systems to be used for crew identification and entry, also with proximity cards. Ideal for restricted areas as the bridge, the engine rooms or the control rooms.

Safety on board

Our offer can be integrated with fire release mechanisms that is easy to integrate into a fire alarm system.

Connectivity wherever you are.

All the corridors and other public areas are amply equipped with universal and data socket outlets, so wherever you are on-board, you can always connect with the outside world.

Easy identification of emergency power lines

Thanks to red sockets it's easy to identify a priority electrical or an auxiliary line. The specific sockets will continue to work even in the event of a power outage. Available for all the switches ranges.

Owner areas

Crew areas

Yachts and sailing vessels.

The naturally elegant way to sail.

Exclusive, but more intimate in scale, yachts and sailing vessels have a clear-cut aesthetic identity that emerges in the electronic and electrical devices too. Yachts and sailing vessels are a concentrated essence of design and technology, formulated for comfort and well-being everywhere on-board.

Cabins. The perfect balance of design and technology

Precise, advanced and designed to meet every need: our devices channel the latest interior design trends, even on the open sea.

And thanks to their top-class performance, operating in-cabin electrical equipment is all pleasure, no effort.

Yachts and sailing vessels

Supreme comfort

All you have to do is stretch out your hand and you can raise or lower your blinds or roller shutters, or adjust the slats on your sunbreak until everything is just as you want it.

It's your cabin: choose how to control it

Lighting, automation and sound signals, all easy to manage, thanks to a set of custom controls that fully meet even the most specific needs.

Versatile functions to give service to the guest

All connection possibilities to manage the comfort in the cabin and the multimedia support to recharge all type of smart devices

The main deck. How to create the right atmosphere

The main deck hosts a disparate range of functions, in the form of technical areas, like the bridge and relaxation areas, like the lounge – but they all have the same thing in common: design and technology.

Our solutions combine high performance, functionality and flexibility, with unmistakable, uniquely Italian style.

Yachts and sailing vessels

The perfect set

All the functions are easily identifiable. Style, comfort and well-being everywhere on-board.

Always the right atmosphere

Easy to customise the wiring system to suit to the specific needs and create scenarios.

Modular design for integrated functions

Adjust the intensity of lighting or switch lights on or off, manage roller shutters, power outlets, USB charging ports. It's perfect for bedside appliances.

Eikon Exé

Eikon Evo

Linea

Arké

Plana

Coordinated styling down to the last detail.

Even wiring accessories can be cool and stylish.

Whatever your style, you can't dispense with detail. We offer a vast range of cover plates to frame our control devices. Available in a wide variety of materials, colours, shapes and finishes, they complement any setting and coordinate with the most specific interior design styles.

Eikon. Two identities

Elegance, excellence, value.

Purity, elegance and classic taste meet advanced technology, cutting-edge features and refinement. These characteristics describe the two souls that make up the Eikon range, with different designs and finishes, all sharing a common feature: excellent energy management.

Eikon Exé
Material and form

Vintage controls
Modern retro essence

Flat controls
Simple yet striking
minimalism

Tondo controls
Elegant and discreet

Eikon Evo
Sophisticated
geometric shapes

Tactil controls
High-tech appeal

Eikon Exé

Eikon Exé

The essence of shapes and materials. Squared corners and striking silhouettes give rise to a range that blends in seamlessly with any environment. Resulting from a meticulous selection process, different top quality finishes, which create a different, original soul each time: glass, leather, mirror, wood, marbled stoneware, brushed, shiny and exclusive metals.

Vintage controls

Vintage toggle switches embrace mesmerising lines of the past restyling them with a modern twist providing an exclusive, slightly retro style. Cover plates can be customized with a precise logo and controls,can be elegantly lasered with pictograms to identify all diverse functions.

Eikon Exé

Flat controls

Planar and square-shaped controls create a pleasant flush-mounting effect, to emphasise the textured appeal of the cover plate. Provided with personalized RGB backlighting, controls can be elegantly laser-engraved with icons and pictograms.

Tondo controls

The base of the control is backlit, creating a very elegant and discreet halo between the button and the plate. The buttons are different depending on whether a traditional or home automation wiring system is used, in order to have an optimized look depending on the device.

The beauty of bespoke

Make your wiring system unique. Exclusive possibilities.

The Eikon series offers a comprehensive range of solutions to customise your system and strike the perfect balance between styling and technology. Special finishes, countless colour combinations for both cover plate and buttons, customised symbols associated with controls, and logo engraving on the cover plate.

- Customize cover and controls**
 - > Choose the colour of the cover plate
 - > Match the colour of the button

- Choose from our special finishes**
 - > Decide on your finish

- Personalize and make it yours**
 - > Engrave your logo
 - > Customise your controls

Special materials and more colours for every interior

Infinite possibilities, exclusive opportunities.

In response to new interior design trends, Vimar offers the possibility of not only choosing premium new materials with touch technology, but also customizing wiring accessories by selecting the colour of the cover plate and internal/external frame. We even help clients to design bespoke aesthetic solutions that enrich and complement the style of their hotel.

Cover plates in over 200 colours

For some types of cover plate, it is even possible to choose the colour that best matches the style of the building. An exclusive opportunity designed to meet the latest stylistic trends and enhance the architectural design.

Uniqueness lies in attention to detail

The Eikon series offers a comprehensive range of solutions to customise your system and strike the perfect balance between styling and technology. Special finishes comprising metals, leathers, glass and stoneware.

A versatile system

Modular design to suit the needs for your international projects.

Easy to match the style to accommodate various installation requirements for home or hospitality applications. Our cover plate offering is distinguished by total versatility in terms of both modular design and installation; for example, match round sockets with the functions and style of the Eikon Exé range for a distinctive effect and simplifying everyday gestures.

From two, three and four modules, through to seven modules to optimize several devices within a single cover plate offering superior styling value. For your international projects, we offer cover plates with between 1 and 21 modules and multi-module cover plates for both vertical and horizontal installation, to design bespoke systems and manage energy in complete safety according to the different international specifications.

International standards and modular design for worldwide energy management

Wiring solutions compatible with more than 100 countries worldwide.

Available in Italian, British, French, German and American standards, our socket outlets help you design and manage your energy systems in complete safety, according to different international specifications. And thanks to their modular design, you can have from 1 to 21 modules, even in a single unit.

More than 200 functions to choose from international standards, modular and versatile solution

Choose from many modular and versatile solutions with all international standards. This flexibility is our way of meeting the different requirements of different countries, to create tailor-made systems for any type of craft.

International standards and different modular configurations/functions

Socket outlets and switches compliant to UK, French, German and US standards, with the relevant installation back boxes for planning and controlling the electrical system in total safety and in compliance with different international specifications. Gridswitch system up to 21 modules; installable vertically or horizontally made to suit specific electrical installation requirements.

Enhance the value of your identity

Highly customisable.

Added value to your identity

To enhance the identity of the accommodation facility, all cover plates can be engraved with a logo provided by the customer. Laser technology allows you to reproduce any symbol associated accurately with the command, for a long-lasting result.

Vast library of symbols to create an intuitive user experience

Buttons and controls can be customised according to the chosen function. Laser technology makes it possible to replicate any symbol accurately, choosing from an extensive gallery of pictograms that identify the most widespread functions. Thanks to RGB technology, customers can also choose the colour of the backlighting.

Eikon Evo

Eikon Evo

Elegant geometries and chromed frame, the design of Eikon capture the latest interior design trends and bring out the best Italian style. Perfect aesthetic coordination with Eikon Tactil.

Tactil controls

A technological jewel. The cover plates are available in various finishes including crystal, solid wood, natural leather, carved stone and Corian®. Colour functions can be customized thanks to RGB LED backlighting for home automation systems.

Linea

Essential design and thin planarity.

Linea combines the essentiality of a refined aesthetic with the most advanced technology: innovation meets tradition also thanks to numerous registered patents. Intuitive thanks to the increased width of the controls. Connected, thanks to the smart and home automation versions. Understated and contemporary design and the pursuit of natural appeal have been interpreted by the neutral colour shades, which are growing in popularity in modern hospitality interiors, creating welcoming atmospheres and easily accommodating various styles.

Aligned control

Axial control

Home automation control

-80%
CO₂ eq. emissions

Linea replaces traditional fossil-based plastics with renewable and recycled plastics and also through the optimization of production processes, the efficient management of product volumes, and the use of FSC-certified eco-friendly packaging, it reduces by over 80% in equivalent CO₂ emissions for a saving of over 500 tonnes of equivalent CO₂ per year.

Furthermore, 97% of Linea's production incorporates plastics from renewable and recycled sources from an ISCC PLUS-certified supply chain (mass balance), contributing significantly to reducing environmental impact.

Distinctive effect on the wall

Aligned control with a patented vertical light beam creates a soft glow on the surface of the cover plate, the result is a discrete yet distinctive effect.

Perfect results in any interior design project

Attention to detail, impeccable finish and state-of-the-art technology. Understated, flat design from the lighting device to the socket outlet, which thus feature perfectly matching styling to blend in seamlessly with any setting.

Linea with XT platform

Experience Technology.

Linea is also digital with the innovative XT platform, a technological experience for building automation. Absolute flatness of the controls. Modular and scalable to adapt to any hotel need. The devices can be scaled over time with extreme simplicity: from the simple control of lights and shutters, to the management of room temperatures and the activation of scenarios for an always up-to-date and functional automation system.

Dynamic LED graphic icons

Laser-crafted graphic icons

Easy scenarios to customize

Laser-engraved graphic icons contained in a comprehensive and broad library of symbols, which allow you to identify the desired function. Dynamic LED icons which can be customised using the View App. Possibility of smart backlighting with white light set to various brightness levels as you prefer.

Expandable and dynamic

Extensive scalability and expandability of controls. You can move the front to other control devices in one simple move, without having to adjust any wiring.

One unique style for all functions

Painstaking pursuit of absolute flatness between all the elements of the lighting device and between different lighting devices. Linea and XT platform perfectly match all functions, with control and socket outlet device.

Arké

A contemporary soul with a strong personality.

Simplicity and personality to enjoy spaces in the best of ways. Inspired by long-standing principles that endure beyond changing fashion trends. It conveys the right mix of character, expressiveness and attention to detail. Convex buttons, finishes and colours, materials made to last.

Arké Classic - White Total Look

Arké Classic - Black Total Look

Arké Classic - Metal Total Look

Plana

Guaranteed continuity.

The timeless design of the Plana series evolves with an aesthetic aligned with contemporary interior design trends. Plana Up is the new range, characterized by seamless surfaces and a minimalist profile, featuring harmonious curves and clean lines that define its distinctive style.

New colours for new atmospheres

Plana Up offers total look, neutral, pastel and metallic finishes with 13 colour palette that transcends trends, including those in the new matt finish - with a surface that is soft and velvety to the touch, as well as resistant to scratches and wear, for sleek settings with a total look.

Plana Up

Plana

Quality and durability

A complete series, ensuring functional continuity and versatility: Plana guarantees protected and secure solutions also thanks to its complete range of waterproof surface mounting enclosures.

Comfort

Energy efficiency

Security

Advanced technology means smart management.

Benefits for guests and crew.

Our solutions bring smart, optimised energy management to every craft, large or small. A total integration between devices, within a cabin, a suite or across the entire vessel.

Advanced management solutions to make every cabin fully independent

We offer integrated systems that simplify daily operations during the sailing, guaranteeing a high level of comfort, well-being for the guest and long-term investment for the management; upgrades and expansions can be easily performed, the bus technology allows for greater flexibility in cabin layout and common areas.

Automated lighting. Total on/off

Thanks to the touch devices you enable the centralised control of each cabin of the cruise and common area and the applications of Well-contact Suite software allow to decide specific functions and manage all devices of the system. The system uses sensors to automatically turn lights on or off based on a guest's entry, exit and movements within the cabin. This also helps with energy savings.

Dimming and brightness control of lighting

The system allows for smooth dimming, enabling precise control over the lighting intensity for different areas of the cabin, such as the bed or a reading area. All it takes is a touch to dim the lighting thanks to DALI connection and activate the preset scenarios.

Scenarios settings and centralised functions

Lighting, shutters or blinds are always controlled. Scenarios can be created in order to collect more functions in one action. A seamless "one-touch" experience.

Always connected with the crew service.

The guest can use the switch handily mounted near the headboard of the bed to control lights, while indicating to crew outside that your cabin is occupied or Do Not Disturb scenario or call the crew for cleaning.

Standard solutions make every cabin fully independent

A small, fully independent alcove. Simply insert a card to switch on the lights and other electrical services, while indicating to crew outside that your cabin is occupied. Using the switch handily mounted near the headboard of your bed, you can control your lights and display standard requests to crew in the corridor. There's a quick charging system for smartphones and tablets and in the event of a power outage, you'll find a removable torch for use as a portable emergency light.

1 Do Not Disturb / Make Up Room display and doorbell button control placed outside cabin

2 Wall control panel to control bedroom lighting, Do Not Disturb and Make Up Room

3 Wall control panel allowing scenes: light on/off and blinds up/down

4 Headbed - easy access to light controls, electric and USB charging sockets

Advanced management solutions to guarantee the best comfort in each area

High-tech solutions give you automated control and enable you to supervise different areas on-board from a central control desk. Passengers in the suites, meanwhile, can control their lighting or blinds and automation locally or defer to pre-set scenarios or central control.

Automated lighting. Total on/off

A single, intuitive interface, like a touchscreen or app, allows the guest to control all lighting fixtures in the cabin, from general illumination to accent lighting. The system uses sensors to automatically turn lights on or off based on a guest's entry, exit and movements within the cabin. This also helps with energy savings.

Scenarios settings and centralised functions

When the guest inserts their cabin card, the KNX system can automatically trigger a personalized welcome scene, adjusting lighting and blinds to their preferences. A seamless “one-touch” experience

Dimming and brightness control of lighting

The system allows for smooth dimming, enabling precise control over the lighting intensity for different areas of the cabin, such as the bed or a reading area, thanks to DALI connection.

Always connected with the crew service

The guest can use the switch handily mounted near the headboard of the bed to control lights, while indicating to crew outside that your cabin is occupied or Do Not Disturbed scenario or call the crew for cleaning

Integration with third-party systems

The KNX standard, allows native communication with all products and systems that use this international protocol, also with Crestron.

Advanced solutions for central supervision and automation of suites

High-tech solutions give you automated control and enable you to supervise different areas on-board from a central control desk. Passengers in the suites, meanwhile, can control their lighting, air conditioning and automation locally, or defer to pre-set scenarios or central control.

Yachts and sailing vessels

1 Wall control panel allowing light scene activation and dimming function

2 Wall control panel managing all the lights in the area and allowing light scene

3 Wall control panel allowing different scenarious

4 Wall control panel allowing scene for the bathroom
