Product description

Reliable doorbell suitable for houses, flats or offices. Handy wireless design.

Enhanced content

Affordable Wireless Doorbell

Want a reasonably priced wireless doorbell you can rely on? The EMOS P5723 doorbell is the ideal choice for anyone looking for a **high-quality, easy-to-adjust device** with the ability to adjust basic parameters.

Reliable range up to 100 m

The EMOS P5723 Wireless Doorbell will satisfy those who love simplicity and reliability. With a range of up to 100 m from the base, you can place the doorbell button not only at the door, but also at the gate or even on the fence.

The doorbell button is also equipped with a light signal. Your guests will always be 100% sure that the bell is working reliably and that it may have just run out of batteries.

Wireless waterproof button

The doorbell is equipped with a waterproof wireless button that is ready for **use in adverse outdoor conditions**. This means you don't have to worry about placing the button under the canopy. And that's not all. There's no need to worry about how you're going to get the wires to the button. **Button** is powered by a single 3V CR2032 battery.

A selection of 36 tunes

[COOKIE SETTINGS](#)

Do you like variety? Do you want to choose a melody that feels good to you? EMOS always has your comfort in mind. You can therefore set your device so that you find the announcement of guests' arrival pleasant. You can choose from **36 common and less common melodies**. You will hear the EMOS P5723 doorbell even if you are on the other side of the house. **Melody**, which alerts you to the arrival of a visitor, reaches **up to 75 dB**.

Functions on commercially available batteries

So you like things to work the way they're supposed to? Then you'll be pleased to know that the EMOS P5723 doorbell is powered by **three 1.5V AA batteries**. For the **button** to work properly, y

more **3V CR2032 battery**, which is included in the package.

Automatic pairing and adding additional buttons

After purchasing the doorbell, you only need to **easy installation**. You insert the batteries into the device and **hold one button and press the bell to pair the base with the button** in seconds. So anyone can set up the doorbell for normal operation.

Does your house have multiple entry doors? Or do you want to have a button at the door and at the gate? Then you will be pleased to know that you can pair the device with up to 8 separate buttons.

You can also pair the button with other types of doorbells (P5712, P5705, P5723).
